# What Was the Holocaust? Guided Note Worksheets

A note to the Classroom Teacher:

This resource is intended to support the presentation "What Was the Holocaust" which provides Grade 6 students with a basic understanding of the Holocaust in an ageappropriate and historically accurate manner.

It is best to use the presentation and the guided notes together with a teacher-led discussion. As you teach each slide, students should fill in the corresponding information. I have provided an answer guide as well for your convenience. I recommend that you divide the presentation into 3–5 lessons so as not to overwhelm the students with too much information at once. Taking the time to have discussions about the information will enrich your students' learning and help you clear up misconceptions as they arise.

This background information is necessary before engaging with Holocaust literature or making connections to the Holocaust-related 2023 Social Studies curriculum expecations:

**A3.7** describe significant events or developments in the history of Jewish communities in Canada, including some of the ways they have contributed to Canada and identify some of the impacts of **antisemitism** on these communities' development and/or identities

**B3.5** describe the responses of the Canadian government to human rights violations during the **Holocaust** and the impact that global changes in understanding and legislation around human rights since World War II have had on the development of Canada's responses to acts of hate and human rights violations

To support with my own explanations, I have used materials from excellent sources, listed on the last slide of the presentation. I strongly encourage you to explore these websites so that you may deepen your own understanding of the Holocaust and increase your confidence with the subject matter. There are many professional development opportunities available.

This resource is part of a growing bundle of materials available for free for Ontario teachers to download at <a href="https://www.liberation75.org">www.liberation75.org</a>.

If you have any questions, edits, or suggestions, I welcome your feedback.

# Where did the Holocaust happen?

The Holocaust began in Germany and eventually spread across most of Europe. Nazi Germany invaded and occupied many countries, beginning with Poland on September 1, 1939. This was the start of World War II.

In World War II, there were two sides: The Axis Powers and The Allies. The Axis powers were Germany, Italy, and Japan. The Allies were all of the countries that fought against the Axis powers. The main countries were Great Britain, the Soviet Union, and the United States, sometimes called 'the big three'. As part of the British Commonwealth, Canada joined Great Britain and fought along with the Allies. Some countries remained neutral, and didn't get involved in the fighting.

The following map shows some of the countries that were involved but it does not tell the complete story. The reality is that alliances changed throughout the war as the military action happened. So, some countries listed here under one category may have been part of another category as well. For example, France was an ally of Britain from the beginning. However, it was invaded and occupied by Germany, so it is listed as an occupied country instead of as an ally.

Another example is Finland. Finland was in a fight with the Soviet Union over their own conflict. Since Germany was the enemy of the Soviet Union, Finland chose to help the German side. They chose the side that they considered to be better for their future, not necessarily because they supported the Nazis.

# How did the Nazis persecute Jewish people?

Fill in the type of persecution next to each description.

Kristallnacht, the night of Broken Glass November 9/10, 1938. The Nazis ordered attacks on Jewish people, businesses, and synagogues. 30,000 Jewish men are arrested.

Boycotts of Jewish businesses, public humiliations, and forcing Jews to wear a yellow star to identify themselves as Jews.

Jewish adults and children were forced to work for the German government and for private German companies as slaves.

The Nazis took all of the property,
personal belongings, and valuables of
the Jewish people.
Using this wealth was an important part
of their plan to expand their power.

Antisemitic laws took away the rights of Jewish people to live as full citizens. Jewish children could no longer attend school. Adults were fired from their jobs.

Without warning or explanation, Jews were removed from their homes and relocated to ghettos and concentration camps where conditions were very poor and many died of disease and starvation.

Some survivors couldn't speak about their experiences because it was
too painful but some some survivors found purpose in telling their stories as often as possible. They believed
that they were doing a service to humanity by telling what happened, by bearing
to the truth. This is called and it is a very important part of understanding the
Holocaust. Since the Holocaust ended nearly 80 years ago, there are very few survivors alive today to give their
testimony. We are fortunate to have thousands of hours of
of testimonies that we can watch. New are also providing opportunities for us to
interact with the testimonies as if the survivors were here in person.
